Smart My Company
509 Cliff Ave, Waterkloof Ridge

February 11, 2021

Dear Hiring team

I am so thrilled to be applying for the Smart My Company internship program. I am writing this letter to express facts about myself that my resume simply cannot highlight. That I have a passion for system development. I have been teaching myself what I can while studying computer system engineering at Tshwane university of technology. JavaScript was such a wonderful coding language for me, being able to use one programming language to build an entire web application is such amazing, not to even mention that you can build desktop applications with JavaScript

When I was at university I took multiple UdeMy courses to supplement my school syllabus. Which are [advanced CSS](#), [Complete JavaScript](#), and Node JS all by [Jonas Schmedtmann](#). I feel in love with web technology ever since, from working with React, Express brings joy to me.

I am good at programming, I didn't limit myself to one programming language that was thought in my class which is c++, I took extra time to learn multiple programming languages such as Python, Go, and typescript. Now I am in the process of learning rust. I have a good grasp of working with modern tools such as Git and cloud computing. My favorite tool is the bash scripting language because it allows me to automate a lot of my work

I know that with the opportunity to fully invest myself in this career I would be able to become a great software developer in your team.

Yours sincerely,

Hendry Khoza
