Dear Hiring team

This letter is to express my interest in the Software Engineering position with Vodacom. With all my skills and experience, I know I will be a valuable member of your team

I am a young, highly motivated Software Engineer based in the Gauteng province with a strong ability to create highly-detailed, Quality software while being consistent with engineering principles. I have studied Computer System Engineering at the Tshwane University of Technology, and I have a strong knowledge of what users enjoy when interacting with the software. In my years of developing software, I have maintained a reputation for being extremely efficient and professional. I am fluent in web development, notably NodeJS and ReactJS. I have had experience in developing websites, web applications, mobile applications. in addition to web development, I also have experience in cloud computing as AWS

I am currently a freelancer, Developing software for clients. The number of clients I receive keep growing, while the feedback I get is overwhelmingly positive. I have developed an online store for a client who producer music to sell beats. With beat store's target audience being young people, I developed the website to be responsive, and accessible via mobiles phone. I am familiar with making a tight deadline, because of this, my client appreciates working with me. In my free time, I enjoy building side project and learning a new programming language

When I say I am a Software Engineer is more than a job title. What I do matters I do not just write code, I build software that changes people's lives and that is a huge responsibility. If you think for a minute about the peoples who use the software I build... They put trust in me. Quality of software is the heart of every line of code that I write. I always write software that:
o works - The program does the task that is design to do
o can be modified - I make sure that my code is easy to read, understand or change
o reusable - I apply object-oriented design so that it will be easy to use part of the program to another program

With Vodacom being one of the most exciting network companies in South Africa right now, I have a strong desire to contribute my skills and more to ensure that Vodacom is visually on top of its game. I am hungry for a challenge, and I believe Vodacom is the perfect place for me to grow even more as a Software Engineer and put my arsenal of skills to its proper use.

Thank you for considering me for the Software Engineer position within your company. I look forward to meeting you. Please do not hesitate to contact me if you have any questions.

Yours sincerely,
Hendry Khoza
